- Thank you so much for the time and effort you put into this course. I was really surprised that it was your first time doing this! You really made class a lot better even if I was having a bad day. You really take the time to make sure each student understands the concepts of this course. I hope you continue to do what you're doing because it's amazing. I wish you the best to your future endeavors and I hope so see you around! ^^
- This is a very confusing class and the way T.A. explained the material was easy to understand.
- Very good math TA. Has a really good understanding of the material and clarifies anything that was not made clear in class.
- Good TA but the discussion feels a bit unnecessary as most of the time is spent on easy problems that everyone in class should already know or we cover problems that hardly contribute to our learning or that are over complicated
- The TA managed the discussion session in a professional and friendly manor. I greatly improved my understanding of the material.
- Very prepared and helpful. Goes over all the relevant material in a clear manner. Always accessible during office hours. Very approachable.
